## Scientific Outreach & Service to the Community

### EDUCATION

**Curriculum Development, CURE lab for introductory biology** involving modeling and programming techniques. (2019)

**CIRTL Scholar** The LSU Center for the Integration of Research, Teaching, and Learning (CIRTL) provides this certificate to graduate students who study STEM education, design and carry out an experiment, and present or publish their findings. I took discipline-based education resource (DBER) courses, independently studied the literature, designed and carried out an experiment while guest instructor with BIOL 7800, and analyzed the data. I am currently writing up the results.

**Curriculum Development, BIOL 7800 Mathematical Modeling in Cellular Biology** with Dr. Kato at LSU (2017). I assisted in conceptual course material development (differential equations, cell biology) and was completely responsible for the technical, programming materials for the course. My lecture materials are available at [my blog](#) and [my code examples here](#)

**Curriculum Development** Helped develop a new coursework for use at LSU course BIOL 1005 Laboratory for non-science majors (2016). To help the students come up with independent research topics, I suggested the inclusion of a proposal presentation prior to their writeup.

**Developed web application** on Ecological Inference to include RxC analysis for assisting lawyers to determine possible cases of gerrymandering using district data (2017). Currently the code is private and still under development.
